# OVERVIEW

The *CUDA Profiling Tools Interface* (CUPTI) enables the creation of profiling and tracing tools that target CUDA applications.

CUPTI provides the following APIs:

- ▶ the Activity API,
- ▶ the Callback API,
- ▶ the Event API,
- ▶ the Metric API, and
- ▶ the Profiler API.

Using these APIs, you can develop profiling tools that give insight into the CPU and GPU behavior of CUDA applications.

CUPTI is delivered as a dynamic library on all platforms supported by CUDA.

See [CUPTI documentation](#).
